

Club Open Day

Sunday 28 August

Nearly ready!!

The show is open...

...with bargains from Ted & Mrs Ted

For what is a relatively small site there is a lot going on from large layouts to small.

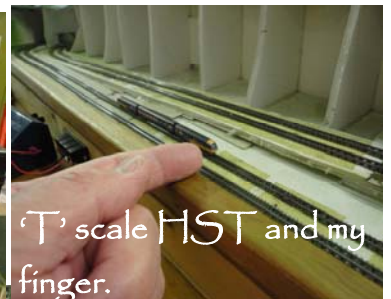

The club's portable 'G' scale

'G' scale Climax U.S. logging loco.

The large layout is the garden type (commonly called 'G' scale) but, surprisingly, does lend itself to being portable for exhibitions.

The smallest commercially available RTR system is 'T' scale, ratio 1/450, Scale 0.64mm/ft and a track gauge of 3mm.

'T' scale HST and my finger.

Other layouts

And more other layouts

The '00' layout in the clubhouse had moving vehicles on the road. A Pickfords pantechnicon is following a Green Line 'bus.'

A bit of nostalgia, Tri-ang trains

But it wasn't just trains...

Steam operated model workshops

Radio controlled boats

Meccano

It is suppose to be under water!

The catering team.

Our team of advisors !!

And thanks to all who helped make the day a success.
